

Industry Accelerator Program

Join a Program Designed for Real Outcomes

Corporations around the world are looking for ways to expand and augment their innovation pipeline. So how can they tap into the global startup ecosystem? One way is through an accelerator.

Accelerators make it possible for large, otherwise slow-moving organizations to discover new startup technologies that can help bring new products and services to market faster. The rising challenge is for an accelerator program to offer a strong value proposition that is unique and compelling enough to startup founders. For corporates, the challenge is how do you move beyond the meet-and-greet model to test viable technology solutions for your company.

That's why RocketSpace has created a new industry-focused accelerator model with multiple corporations and an embedded product validation phase to drive real results.

"We chose RocketSpace because they know deeply how to help startups and corporate professionals. Their innovation ecosystem with access to high-quality startups enable us to build the most attractive and effective accelerator program."

– Xoan Martinez,
CEO, Kaleido Logistics
Founding Partner,
Logistics Tech Accelerator

Sample Cohort Timeline

A five-year program with two six-month cohorts annually.

1-2 Months	1 Month	2 Weeks	1-2 Months	2 Months	1 Day
Strategic Planning Phase	Startup Applications Open	Final Startup Selection	Acceleration Curriculum	Product Validation	Final Demo Day

A Framework Designed For Success

Attracting the best startups

Proactive outreach, a multiple corporate model, and no equity requirements generate greater interest in the program among a higher caliber of startups.

Corporate-driven program

Our program is designed with the corporate needs in mind – from crafting strategy and tech themes, to identifying startup selection criteria, to the pilot designs for each cohort.

Embedded product validation

A product validation phase helps advance corporate-startup partnerships. Participating corporations are able to design and test new startup technologies.

Unbiased and independent partner

Unlike other programs, RocketSpace does not take equity in the startups, which allows us to drive a successful program without any bias actions in program design.

Founding Partner

- Positioned as the co-founder of the program
- Own program strategy
- Input on corporate collaborators
- Input on startup criteria and selection
- Participate in pilot testing
- Investor in startup funding (optional)

Corporate Collaborators

- Input on startup selection
- Access to mentor program for your employees
